

VOLUME INDEX

(The first number cited is the issue number.)

Aircraft	
"High-Temperature Properties of René 41 and Astroloy"	1-3
"Evaluation of Aircraft Material by Fracture"	2-33
Aluminum alloys	
"Refinement of Aluminum-21% Silicon Casting Alloys"	1-54
"Functional Surfaces by Vacuum Metallizing"	3-7
Compression properties	
"Compression Testing at Elevated Temperatures"	3-30
Corrosion tests	
"Failure of Steam-Water Heat Exchangers"	1-68
"Analytical Procedures for Evaluating High-Temperature Failures"	1-90
"Evaluation of Structural Materials for Corrosion Resistance"	2-45
Design requirements	
"Fabrication Techniques for Aerospace Systems"	2-3
"Selection of Materials for Some Aerospace Systems"	2-15
"Evaluation of Structural Materials for Corrosion Resistance"	2-45
"Materials Problems in Stationary and Mobile Power Reactors"	2-112
Ductile iron	
"Properties of Gray and Ductile Irons"	1-12
Ductility	
"Notch Toughness of Structural Sheets"	2-58
Embrittlement	
"Failure of Steam-Water Heat Exchangers"	1-68
Fatigue properties	
"Influence of Atmospheric Moisture on Fatigue of Hardened Steel"	3-57
Forming	
"Forming at Austenitizing Temperatures for Distortion Control During Heat Treating"	3-3
Finishing	
"Functional Surfaces by Vacuum Metallizing"	3-7
Fracture	
"Evaluation of Aircraft Material by Fracture"	2-33
"Fracture-Toughness of Steel for Pressure Vessels"	1-75
Gray iron	
"Properties of Gray and Ductile Irons"	1-12
High-strength steels	
"Notch Toughness of Structural Sheets"	2-58
"The Metallurgy of Weld Heat-Affected Zones in HY-80 High Strength Steel"	3-82
High-temperature failures	
"Analytical Procedures for Evaluating High-Temperature Failures"	1-90
Impact test	
"Fracture-Toughness of Steel for Pressure Vessels"	1-75
Interrupted quenching	
"Forming at Austenitizing Temperatures for Distortion Control During Heat Treating"	3-3

Magnesium	
"Magnesium and Automobiles"	4-30
Marine	
"Quenched and Tempered Steels in Ships' Structure"	4-46
Metallography	
"Microstructure vs Corrosion Resistance"	3-15
"Quantitative Metallography"	3-70
"Quantitative Metallography - Part II"	4-62
Metallurgical management	
"A Materials System Program"	3-62
Nickel alloys	
"High-Temperature Properties of René 41 and Astroloy"	1-3
"Creative Metallurgy"	4-92
"High-Vacuum Induction Melting"	2-103
Notch sensitivity	
"Notch Toughness of Structural Sheets"	2-58
Nuclear reactors	
"Materials Problems in Stationary and Mobile Power Reactors"	2-112
Performance characteristics	
"Failure of Steam-Water Heat Exchangers"	1-68
"Fracture-Toughness of Steel for Pressure Vessels"	1-75
"Analytical Procedures for Evaluating High-Temperature Failures"	1-90
Refractory metals	
"Fabrication Techniques for Aerospace Systems"	2-3
"Gas-Pressure Bonding of Refractory Metals"	4-3
"Welding Refractory Alloys"	4-21
Rhenium	
"Rhenium for Electron Tubes"	4-109
Semiconductors	
"Metallurgical Problems in the Semiconductor Industry"	4-83
Spacecraft	
"Fabrication Techniques for Aerospace Systems"	2-3
"Selection of Materials for Some Aerospace Systems"	2-15
"Rocket Case Application of Vacuum Melted Steel"	4-39
Titanium alloys	
"Effect of Structure on the Properties of Titanium Alloys"	2-70
"Microstructure vs Corrosion Resistance"	3-15
Transformation and resulting structures	
"Strengthening Low-Alloy Steels by Deforming Austenite"	1-41
"The Metallurgy of Weld Heat-Affected Zones in HY-80 High Strength Steel"	3-82
Vacuum-melting	
"High-Vacuum Induction Melting"	2-103
"Rocket Case Application of Vacuum Melted Steel"	4-39
"Application of Ultrasonic Vibrations During Solidification of Vacuum-Arc Melted Ingots"	4-72
Welding	
"Electron-Beam Welding"	2-89
"Alloying During Welding"	3-39
"The Metallurgy of Weld Heat-Affected Zones in HY-80 High Strength Steel"	3-82
"Gas-Pressure Bonding of Refractory Metals"	4-3
"Welding Refractory Alloys"	4-21
